

PARI BOY® *N* family

Simply fast inhalation

- Even better and faster nebulisation
- Appealing design with an integrated and ergonomic shaped handle
- Lighter and easier to handle, especially for children and the elderly
- 3-year PARI-Quality-Guarantee
(on the PARI BOY® N compressor)

Generation *N*

Specialists in effective inhalation

PARI BOY® *N* family

Innovative technology for daily,
effective use in inhalation therapy.

PARI TurboBOY® *N*

Standard nebuliser system – one for nearly all
(4 years and older)

- for short nebulisation treatments and reduced aerosol loss
- provides effective continuous nebulisation
- includes the PARI LC PLUS nebuliser

PARI JuniorBOY® *N*

For babies and small children

- more fun with the bright and cheerful colors of the funny PARI Friend
- includes a soft silicon mask, elbow piece and a small child's mouthpiece
- allows nebulisation while sitting or lying down
- includes the PARI LC PLUS Junior nebuliser

PARI BOY® *N*

Ideal for long term therapy

- intermittent nebulisation can increase drug delivery by reducing aerosol loss
- can be used in combination with all of the PARI accessories, i.e. THERM or PEP System
- also includes the highly durable PARI LL nebuliser with interrupter button

Generation *N*

PARI is not just satisfied with developing good nebuliser systems. They also have to be faster. Everyone would like to have faster and even more efficient treatments. That's why treatment time is so important.

In summary: The PARI BOY®N family – is faster and more effective!

Indications:

For respiratory tract diseases, i.e. asthma, bronchitis, rhinitis, obstructive lung diseases, changes in the respiratory tracts (atelectases or bronchial ascs), cystic fibrosis.

The simple and effective therapy:

- easy handling
- short inhalation treatments

Hygienic advantages – all PARI nebulisers:

- are dishwasher safe
- can be disinfected by boiling
- can be autoclaved
- can be chemically disinfected
